FOR IMMEDIATE RELEASE

**CASSEL Inspection to Preview Soon-to-be-Released SHARK 3,
Among Inspection System Highlights at PACK EXPO 2022**

Booth highlights will include an exclusive preview of the soon-to-be-released SHARK® 3, the future of inspection technology.

Oak Creek, WI (October 12, 2022) – [CASSEL Inspection](#), a custom provider of inspection solutions for food production, plastics, pharmaceuticals and more, will be on the exhibit floor at [PACK EXPO International 2022](#) to highlight the breadth and depth of the company’s line of inspection products, including configurable and customizable solutions in metal detection, X-ray inspection, and checkweighers. Among the inspection system highlights included will be a preview of the latest technology advancements in detection capabilities – the soon-to-be-released SHARK®3 Metal Detector.

CASSEL Inspection booth highlights will include:

- SHARK 3 Metal Detector prototype - Sneak peek and review of the innovative new metal detection technology
- [METAL SHARK BD + C80 COMBO](#) - Combo checkweigher with metal detector
- [METAL SHARK GF](#) - Gravity-feed, small drop-through metal detector
- [XRAY SHARK XD38-H1](#): X-ray inspection

CASSEL Inspection representatives will be available throughout the show to discuss the latest inspection technologies and how they make quality assurance processes safer and more efficient. PACK EXPO International 2022 kicks off on Sunday, October 23, and runs through Wednesday, October 26, at McCormick Place in Chicago, Illinois. CASSEL Inspection will exhibit in booth [N-5480, located in the north building](#).

“Our team looks forward to meeting with PACK EXPO attendees to learn about their unique challenges and needs, and share how our package inspection solutions can help improve quality assurance processes to better protect investments, reputations, customers, and

ultimately, consumers,” said Paul Payerle, Commercial Leader for CASSEL Inspection. “This year is particularly exciting as we will offer an exclusive preview of the next generation of detection technology, the SHARK 3 Metal Detector, which will be available for purchase next year, 2023.”

For an in-depth review of the future of detection technology and to see current machines with exceptional detection capabilities and the applications in which they are used, attendees can visit booth N-5480 in the north building from Sunday, October 23 until Tuesday, October 25, from 9:00 a.m. – 5:00 p.m., and Wednesday, October 26, from 9:00 a.m. – 3:00 p.m.
